

Quake Recorded
At Point Loma

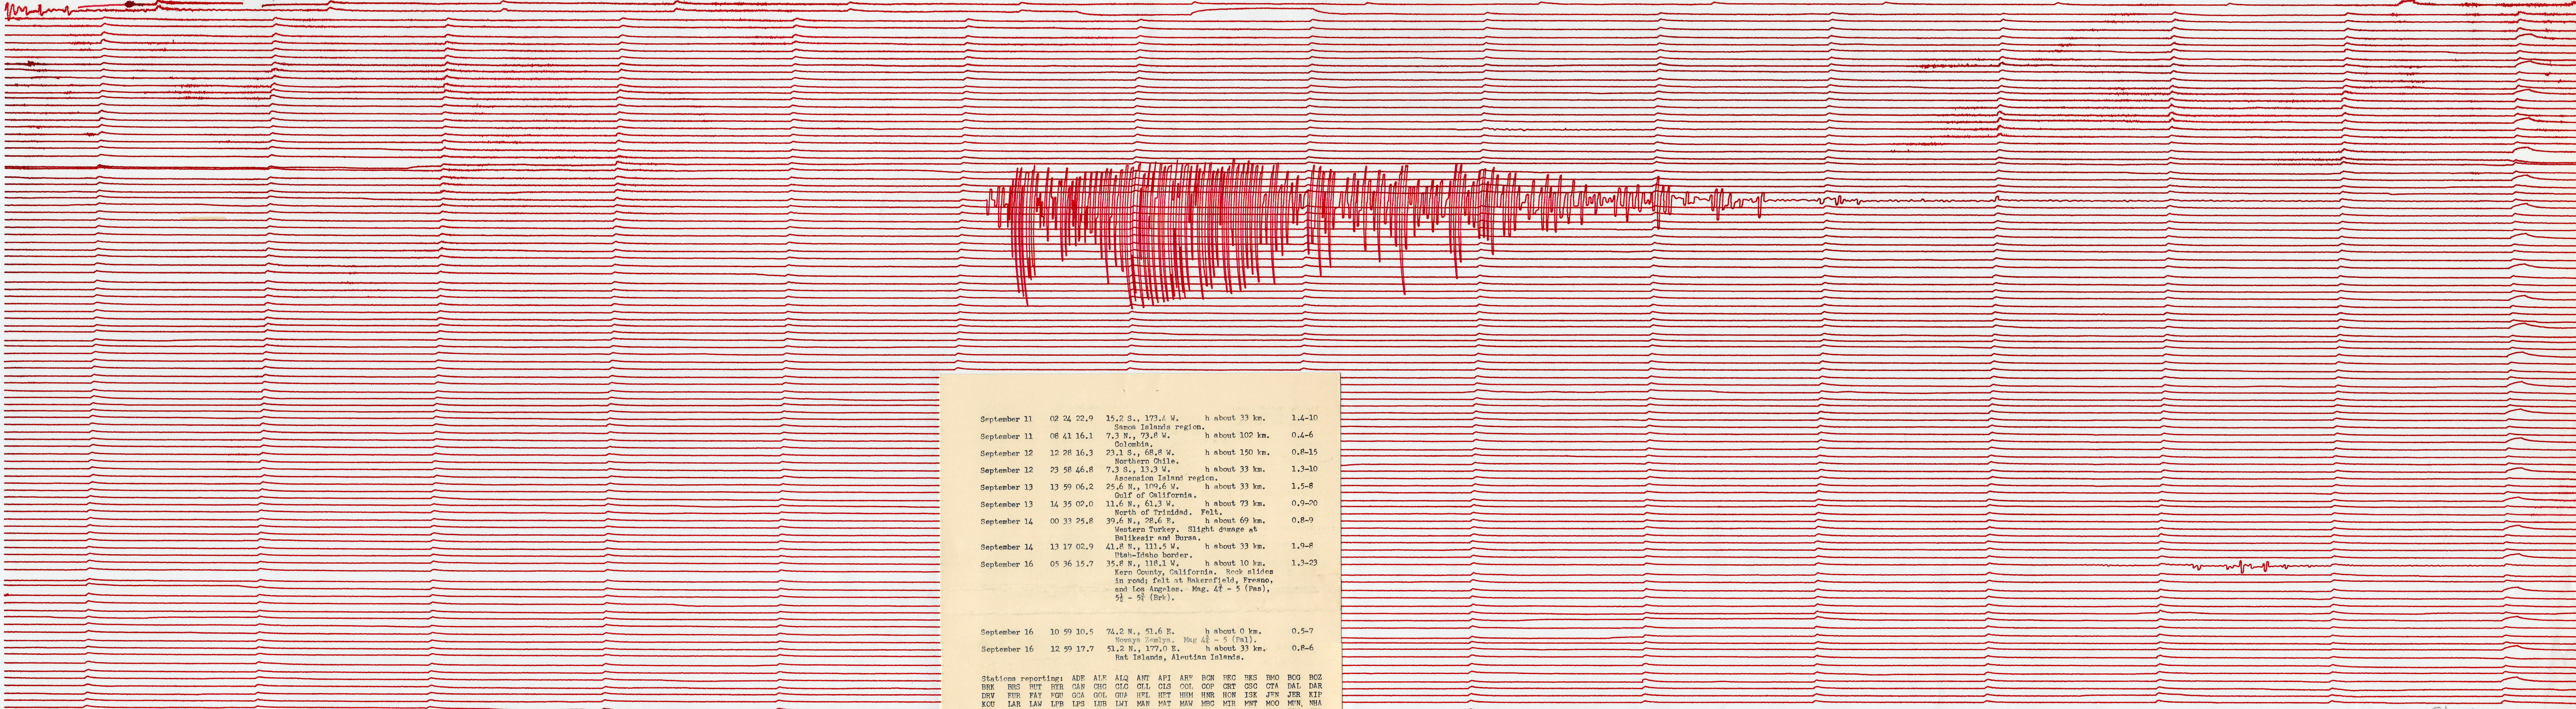

An earthquake of two-plus intensity on the Mercalli scale of 12 was recorded for five minutes starting at 10:47 p.m. yesterday, according to Fred Robinson, Point Loma seismologist.

"Only people on upper floors likely would have noticed it," Robinson said. "They might have seen chandeliers or other suspended objects start to swing."

The Associated Press in Los Angeles said it received phone calls from Hollywood residents asking if there had been a tremor.

Robinson said he could not determine the quake's origin.
